Pioneer **in smart retailing** system
The Intelligent **Vending Machines**

about us

Vendolite is revolutionizing the global vending market with cutting-edge technology. We are into vending machine business since 2013. We are India's first vending machine Merchandize, dealing with manufacturing, rental, retail, wholesale, and franchise model. For the past five years, we have consistently ranked as India's first. We have more than 6K vending machines installed worldwide. We are the first company to develop stationary, PPE, medical, and lightweight vending machines in 2015-16. Our Technology and software are in global demand. We are on our journey to be Global Largest Retailing Network through our advanced smart Vending Machines.

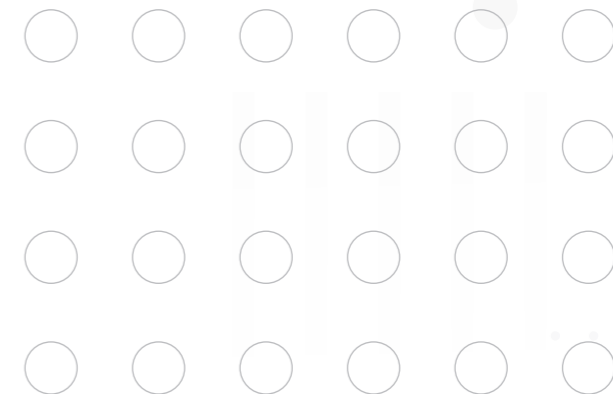

Building a mission and a business go hand in hand.

Our Mission

Vendolite's mission is to provide reliability, technical capability, and cost-effectiveness, as well as a variety of services that meet our customer's needs and requirements with the utmost quality and consistency, we make technology and innovation an inseparable ingredients of our customized solutions. We focus on three key areas: product selection, machine maintenance, and customer service.

Vision with **action**
makes a **powerful reality.**

Our Vision

We are on our journey to be Global Largest Retailing Network through our advanced smart Vending Machines. We are initiating a new technological spin in the global retail market. We accomplish our vision through Quality, Sustainability, innovation, personalized service and customer satisfaction.

Our Core Expertise

Cloud-based Technology

Vendolite has elaborated data about the Sales dashboard. You can monitor & manage Machine's live status, Stock data, Refilling data, Stock in a warehouse, Product list, Top- Selling, Refund Status, and Automatic & Manual Systems.

IoT Enabled

With an IoT-enabled smart vending solution you can reduce costs, increase revenue and improve customer service – all from a single centralized point of control. We invest in cloud-based technology to ensure we have control over the sales, real-time data, and the status of all our equipment 24/7.

Flexible Payment

Vendolite provides various payment options such as cash, card, and UPI payments, as well as customizable authentication methods like RFID, allowing for cashless vending.

Customized Solution

Our range of machines is designed for different requirements and is equipped with a variety of features including elevators, conveyors, touchscreen displays, and more. These features can be combined and customized to meet specific needs, providing a tailored solution for our customers.
